Applicant

TOKYO ELECTRON LIMITED

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

	Claims <u>NONE</u>	NO

**2. CITATIONS AND EXPLANATIONS**

Claims 1-37 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest an apparatus for detecting light absorption by gaseous species in a processing chamber comprising at least an infrared source and sensor and first and second optical assemblies for transmitting the light into the chamber and receiving light passing through the chamber, respectively. The examiner notes that while it is known in the prior art to measure gas absorption of gaseous species related to a processing chamber operation (McAndrew et al. -- US 5,880,850, for example), the prior art is arranged to measure the light absorption by the gaseous species in the effluent steam of the processing chamber (i.e., outside the processing chamber). It is also noted that in other prior art optical measuring apparatus (Quick -- US 5,793,042 and Solomon *et al.* -- US 5,900,633, the apparatus are not configured to measure the light from gaseous species within the chamber, but are configured to measure the light absorption of objects being processed in the processing chamber.

Claims 1-37 the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
